We can give perfect shape to your idea with our experts, technologies and tools. We carve your unbaked ideas to a new shape and turn it into user-engaging products. Come to us with your idea and our productive team will convert it into a gem. We love to listen, guide, design, develop, support people who are needy.
Mr. Thanga Pandi, Founder and CEO

Thangapandi has over 11 years of experience in Engineering, Operations and business development in Technology and service industry. He firmly believes and practices that the key to develop a successful IT company is to be adaptive and agile in aligning with customer requirements along with managing and retaining top talent.

TP founded Osiz Technologies in Madurai in 2010 as a software service company focused on providing custom software development services.

Mrs. Kiruthiga Thangapandi, Co-founder and M.D

With a Engineering graduate from Anna University Kirthiga put in great efforts to reach where she is today. She started off with freelancing in her preliminary days and put down the lid of a comfortable freelancer; gaining a good amount of experience in her start off days it made her proficient enough in 2010 to form Osiz Technologies as a Private limited company and it brought her great amount of joy as all the hard work compensated.
Customers & TRUST

Trust brings customers closer to our business. With proven results of products and projects, we are happy to have earned thousands of clients’ trust, and the job is to work hard to do so every day.

Members & PRIDE

People are an invaluable investment we have made. And we take pride in our members and in everything we have done. The things that we, as a team, have poured our best efforts, and passion into it.

Web Design & Development

We turn any request of clients about web design & development into real works. Packed with 8 years’ experience in developing websites, we know how to create state-of-the-art websites that engage your visitors and convert.
Our Cutting Edge Technologies

As an Offshore Software development Company specializing in web and mobile apps development. Our expertise lies in reducing costs and improving productivity by bringing the strategic advantage of Software Outsourcing and Offshore Software Development to the doorstep of our customer in more ways than one. Thereby improving reliability, speed, agility and enabling our customers to achieve sustainable differential advantage over their competition.

Our engagement models are flexible, scalable, secure and custom defined based on specific individual needs of our customers. We follow the right strategy to ensure business transformation, lower operational costs and quick time to market ensuring 100% success for our customer’s business and in the process ensuring business continuity for us. We are engaged in the following technologies.
Mobile app Development

Don’t let your ideas of apps just slip through the cracks. We’ll take time to listen, tailor your needs, and help translate your ideas into apps. The ones that are not only quality-assured but get more customers to come.
Blockchain Development

Blockchain technology is transforming the prospect of digital information in terms of data preservation and collection. Usually referred to as a public ledger distributed in a nodal arrangement, blockchain excludes the requirement of transaction reconciliation. Decentralized cryptocurrencies based on blockchain technology have found their way into alternating the digital transactions creating an online economy. Decentralization is the future of technology making blockchain backed applications imminent.

Our Adventure and The Road Ahead

"If you intend to build a skyscraper, a firm base must be planted first."

Growth is not something that can happen overnight. If something comes easy, it will pass by soon.

This has been our motto from the beginning. It takes a really long time to reach where we are standing today. And we are still trying to improve every day.

Initial Stage

Getting people to know about us is the one thing that we focus on at the initial stage. That’s why web design and development services were adopted as the strategy for this stage Our Adventure and The Road Ahead Initial Stage With the business-driven design mindset, and the hands-on experience in web design and development services.

And people need more, so we have to roll our sleeves up to create more. The increasing number of our product users lets us know how far we have helped, and reached to our customers. Working with them gives us chances to develop our resources, and experiences. We are able to improve our products, and widen our portfolio in the process as well.

The Next Step - Clients & Technology Partners

However, clients’ needs are not just web development. There are demands for bigger things - building a new web Applications, customizing important functions revamping their business needs, translating their ideas into apps, etc.. So, our job is to build the resources for this. And this is our mission for the next and current phase - building a strong development team to cater for the global outsource needs, especially our clients & partners. As a client, you can be an end-user that has demand for site, app development. We will take the time to listen, and work with you directly to make the best of your budget, to turn your rough ideas into a converting website, and paying customers.

Empower Correlated Services

As talked, we build our resources throughout the time working on our products, and projects. we have also supported clients in terms of UX/UI design and branding. Design team plays as a separate but supporting team for all of our products, and services. Web & mobile development are our main services. Our skills have elevated to a higher new level compared to where we were years ago System and maintenance service came as the indispensable need of clients when setting up websites. Many of them do not have the time, and technical ability to manage the server, and security. All of these services are bone & blood. They are well connected to one another. They rise along with our experiences & the company’s growth. We’ll have the ability to create special products. It’s been embedded as our core strategy that we’ve been working hard for. And as a growing software company in a fast-changing digital world, our job is to make an effort to improve ourselves every day, to expand our skills to a deeper level.
PATRICK KRHENBHL
United Arab Emirates

OSIZ Technologies developed a web application for us over a period of 8 months. We are most pleased with the level of service and dedication of the developer assigned to this project. She always did her best to meet our expectations and never hesitated to implement changes we required. The company’s customer service attitude, also during the support period after the project was completed, is fabulous. Overall, we are happy to recommend OSIZ Technologies for web development projects.

NICKY G KHUN
South Africa

Great work! I have been working with OSIZ Technologies for three months, and I am very satisfied with the outcome of the work produced by them. I have dealt with crypto exchange and trading website, an excellent professional and with the best customer service. I emphasize the wide knowledge in the type of platform that they developed to me, as well as the flexibility during the development of the project. The good work developed gives me the confidence to work on new projects with OSIZ Technologies.

MUSAWENKOSI DUMA
Kenya

I’ve been working with OSIZ Technologies for over two years now developing cutting-edge 3D product tools. The team’s ability to translate client requirements into reality is secondary to none. The communication channels are flexible and the team is very patient, respectful and customer-centric in its overall approach. Their prices are very affordable compared to the few competitors out there. I certainly consider OSIZ as an extension of my team as I put to motion my company’s share growth plan.

NICK DASWANI
Hong Kong

I have been working with OSIZ Technologies for over a year right now and I have been extremely happy with the outcome of the work produced by them. I have engaged them in website development, SEO and for several other projects. The OSIZ team are committed to delivering high-quality work and have on a number of occasions exceeded my expectations. The team is easy to work with, respectful and hardworking. I would without a doubt recommend OSIZ Technologies to anyone interested in growing their online business presence.

My Experience is awesome one to be Honest This Company handle P2P exchange Platform with excellent out perform Result. Very Professional in talking to their clients. No one capable to win my heart like this.

Rajkapoor Singh
Co-Founder at fortune.exchange
It’s a nice place to bumble up the job work of blockchain technology.

Martin Naka
President at AmaflataInternet Corporation
I just experienced the best customer service from Osiz Technologies Pvt Ltd. It was my pleasure to work with Ms.Sathiya Priya (Business Analyst) for the project. She was so kind and helpful in every stage of the work. Not only her, I should thank the Project Management team too! Everything was simple and well organized. Would I recommend Osiz team? Definitely, yes! They matched the exact requirement of what we asked for. If I can help in any way in the future, please count on me!

Hari Mulyadi
Indonesia
I am very happy to be able to use services and make applications with bitdeal, very good for making systems and others, this company is highly recommended.

Paulo Aury
Co-Founder at fortune.exchange
I really enjoyed the service provided by the company. The Osiz did everything as the expected.

Luke Ozimski
Indonesia
Great recommendations for his business. I am the owner and CEO of 3 different companies based in Europe and Asia. I worked 6 months at the moment with Osiz, everything is done to the last detail. I use them for programming services on two different projects and I am very impressed with the effectiveness of their work.

Franklin Peters
Chief Executive Officer at Bitht
What do you like most about the company?
I enjoyed every single moment I worked with Osiz technology.
