OSIZ
GIVE PRODIGIOUS FUTURE!
One company that has a superlative quality of software application development services with skilled professionals to develop a crystal-clean application for our clients. We give End-to-End solutions in all types of industry for small-scale and large-scale businesses into growth-driven, revenue-based, profitable organizations. Within a short span, we have skyscrapers across the globe.
Osiz always works for the customers’ satisfaction and happiness more than the business profit. For that, we associate with prospective technologies and innovations to match the market needs of our clients.

Our mission is to develop "State of the Art" websites that help businesses thrive into today's competitive marketplace. We fully understand the need for businesses to promote and develop their brand to future customers.

Our vision is to provide complete business solutions with "Leading Edge Technology" and became the best IT service provider in India.
The founder of Osiz is Thangapandi. He constructed a software development organization in 2009 in Madurai, Tamil Nadu (India). With a crew of 7 employees, they carried out the complete operation in a house.

- **2009**: The team was expanded into 25 employees after 2 years of consistent efforts. With operational setup at PTN Complex, Thirumangalam.

- **2010**: Within 1 year, it gradually scaled up to 40 employees in 2012, and then shifted to Vincent Complex, Teppakulam, Madurai.

- **2012**: Osiz standard up in 2013 with web and mobile-based app solutions. By the cooperative efforts and hard work of Mr. Thangapandi, cordial client relationship was scaled height.

- **2013**: With the persistent 6-year efforts, Osiz has become an iconic model and grabbed oceans of clients, Mr. Thangapandi to set up corporate headquarters at Thanakkankulam, Madurai, in 2015.
In the year 2017, the exploitation of Osiz Technologies is a cohort in both fields of the blockchain/IT software organization. Osiz’s CEO Mr. Thangapandi has attained the second phase in 2018. Osiz has become a world-class IT industry with a rewarding workforce of 300+ employees. Within 1 year, it gradually scaled up to 40 employees in 2012, and then shifted to Vincent Complex, Teppakulam, Madurai. After 13 years of the journey, Osiz has perpetually paved many industries and organizations successfully. It has been transcending the latest technologies with quality, integrity, and on-point delivery. Even in 2021, Osiz has numerous existing clients with prolific projects and newbies clients to succeed in the future. We also printed our footprints in many technologies such as NFT, DeFi, Hyperledger, Cryptocurrency, On Demand solution, DApp, Token and some more.
STARTUPS
For the Startups ventures, we prepare the foundation, implement their ideas, bring them to reality, and make them grow to rule a triumphant business.

ENTERPRISES
To further upgrade the Enterprise by shaping them to have a new business and to become a supreme firm, contributing services and support to get profitable business.

WE WORK WITH

AGENCIES
We also take the diversity of ideas from the Agencies to accomplish the goals with our enrich solution for them. And to move their business profile into the next level.
Strengthened by 13 years of experience in operations, engineering, and business development in the software industry, Thangapandi, a versatile tech-entrepreneur, is a firm believer in the concept that only adaptation and agility in aligning with the customer requirements can enhance business solutions to accuracy.

Kiruthiga, an engineering graduate, started her career as a business analyst. In 2011, she assumed the role of Managing Director of Osiz Technologies. With 11 years of experience in Management and Administration, she proves to be one of the primary pillars of the organization.

Kamalakannan, the Chief Operating Officer, specialized in Electronics & Instrumentation engineering. Influenced by his 13 years of managerial and business development experience in the technical industry, he was appointed as the Chief Operating Officer of Osiz Technologies in 2018.
Osiz Technologies operates on the 3 types of business models

**FIXED COST MODEL**
Small to mid-scale projects with a well-defined fixed cost model to make efficacious outcomes. Pre-negotiated quotations and targeted time-frames enable a hassle-free process.

**TIME & MATERIAL MODEL**
Deployment of the pay-per-use engagement model that deals with hourly rates. Though the initiation of the project is based on a defined scope, it is subjected to mid-stream changes.

**DEDICATED HIRING MODEL**
Long-term projects can benefit from the exclusive allotment of an in-house team of developers from the organization's Offshore Development Centre. The assignment of virtual employees helps clients cut substantial costs.
